

Assignment — Authentication Flow Testing

Cypress End-to-End Testing | Hub Web Application

This assignment covers end-to-end testing of the authentication flow for the Hub web application. The Hub uses a dedicated login page where users sign in with their email and password. Depending on the user's role, a different dashboard is shown after login — for example, an Admin sees a different view and different navigation links compared to a Store Manager or Owner.

Additionally, users can be linked to multiple merchant profiles and can switch between them without logging out. You will test that profile switching works correctly and that the dashboard updates to reflect the selected profile.

Your task is to write Cypress test cases for all scenarios listed below. You are given staging access — use browser DevTools to find element selectors.

Staging URL: <https://staging-auth.tiara.jewelry/>

Merchant: Sneha K

Login Credentials:

Role	Email	Password
Admin	cypress.admin@irysgroup.com	teamwork
Owner	cypress.owner@irysgroup.com	teamwork
Store Manager	cypress.storemanager@irysgroup.com	teamwork

Profiles (linked to the Admin account):

Profile	Name
Profile 1	QA

Profile	Name
Profile 2	QA2

Note: Sections 1 and 2 can be tested using any one of the credentials above. Section 3 requires the specific role credentials listed per test case. Section 4 (Profile Switching) should be tested using the Admin account which has access to both profiles.

Important: Do not change passwords, delete accounts, or modify any user data on staging. These credentials are shared across all candidates.

Section 1 — Login & Logout

#	Scenario	Expected Result
1	Successful login with valid credentials	User is redirected to the Hub dashboard
2	Login with wrong password	Error message appears, user stays on login page
3	Login with invalid email format	Validation error shown on the email field
4	Submit login form with both fields empty	Required field errors shown for both fields
5	User logs out	Redirected back to login page
6	Access Hub URL directly after logout	Redirected to login page, Hub not accessible
7	Page refresh while logged in	User stays logged in, dashboard still shown

Section 2 — Forgot Password

#	Scenario	Expected Result
8	Click "Forgot password" link on login page	Forgot password form appears
9	Submit forgot password with empty email	Validation error shown on email field
10	Submit forgot password with valid registered email	Success or confirmation message is shown
11	New password and confirm password do not match	Validation error shown, form not submitted
12	Submit new password that is too short / weak	Validation error shown describing the requirement

Section 3 — Role-Based Login

#	Scenario	Use Credentials	Expected Result
13	Login as Admin	cypress.admin@irysgroup.com	Admin dashboard loads with Admin-specific widgets visible
14	Login as Owner	cypress.owner@irysgroup.com	Owner dashboard loads, layout differs from Admin
15	Login as Store Manager	cypress.storemanager@irysgroup.com	Store Manager dashboard loads correctly

#	Scenario	Use Credentials	Expected Result
16	Admin sees User Management in navigation	cypress.admin@irysgroup.com	User Management nav link is visible
17	Owner does not see User Management in navigation	cypress.owner@irysgroup.com	User Management nav link is not visible
18	Store Manager tries to access a restricted URL directly	cypress.storemanager@irysgroup.com	Access denied screen shown or redirected away
19	Logout as one role then login as a different role	Admin + Owner	Correct dashboard for each role loads every time

Section 4 — Profile Switching

#	Scenario	Use Credentials	Expected Result
20	Profile switcher is visible after login	cypress.admin@irysgroup.com	Profile switcher option is visible in the header or account menu
21	Current profile name is displayed correctly	cypress.admin@irysgroup.com	Profile name "QA" is shown in the UI after login
22	Switch from Profile QA to Profile QA2	cypress.admin@irysgroup.com	Profile QA2 is selected and dashboard reloads with QA2 data

#	Scenario	Use Credentials	Expected Result
23	Profile name updates after switch	cypress.admin@irysgroup.com	Profile name shown in UI changes from "QA" to "QA2"
24	Dashboard data changes after profile switch	cypress.admin@irysgroup.com	Content on dashboard reflects QA2 profile, not QA
25	Switch back from QA2 to QA	cypress.admin@irysgroup.com	Profile QA dashboard and data are restored correctly
26	Page refresh after profile switch keeps correct profile active	cypress.admin@irysgroup.com	After refresh, QA2 is still the active profile, not reverted to QA
